Join us in this fantastical, fun-filled adventure where you'll become a fully practicing magician and learn to perform both stunning stage feats and dazzling close-up innovations! In this program, you'll discover the magic secrets tightly guarded for centuries, passed down only from magician to magician. From changing objects to mystic mind boggling, we have several tricks to hide up both your sleeves. We'll learn to perform famous wonders such as making objects disappear from thin air, and then re-materialize again as if nothing had happened. And as if that wasn't enough, we'll show you how to astound with a mastery of mind-reading tricks. By the end of this program, you'll appear to pick answers right out of your audience's brains! Each trick is specially tailored to suit a young magician's unique talents; because we know your amazing abilities are as vast as your imagination. All the tricks you've learned are yours to keep at the end of the program!

## ***Photography***

In this exciting adventure into the world of photography, you'll learn all the tricks of the trade just like the pros use. From blue skies and green trees to friendly smiles and sandaled feet, you'll capture it all as you view the world through the lens of a camera. Each student is provided with professional equipment, snapping photo after photo for their very own portfolio. Our instructors teach you the ins and outs of photography from arranging the perfect still shot to capturing objects in fast and furious motion. And because all young stars deserve their time to shine, we'll create a gallery where you can show off your artistic images to friends and family at the end of the program.
